

India EV Fast Charging Summit

📅 21st Nov 2024 at The Park Hotel, Delhi

With over 4 Million EVs sold in India, EV adoption is fast approaching the Inflexion point supported by an enabling ecosystem, supportive Government policy, and increased consumer awareness. The rollout of charging infrastructure and the availability of fast charging are integral to the continued growth of EV adoption. Fast charging of electric vehicles enables charging of vehicles in a shorter period of time, compared to conventional AC charger charging with aim to reduce charging time and helps increase convenience for electric vehicle users in terms of mobility and waiting times.

The PM e Drive scheme aims to address range anxiety by promoting the installation of public EV charging stations (EVPCS), with Rs 2,000 crore dedicated to installing 22,100 fast chargers for e-4Ws, 1,800 fast chargers for e-buses, and 48,400 fast chargers for e-2Ws and e-3Ws. At this summit, we will focus on fast-charging technologies, the global landscape, standards, correct installation, roadmap, key opportunities and challenges.

Who Should Attend

- EV OEM's (e2W, e3W, e4W, e Trucks, e Buses)
- Charge Point Operators/Charger Manufacturers
- Utility Companies/Discoms
- Fleet Operators
- Technology Providers
- EV Component Manufacturers
- Financing Companies
- Government Officials, Regulators, Policymakers
- Software Solution Provider

Key Discussion Themes

- ⚡ Fast Charging Technologies, Global Landscape
- 🌐 Global Standards and Deployment Status
- 🔌 Challenges and Countermeasures for Charging Infrastructure
- 🚗 OEM, Fleet Operator, CPO & Discom Perspective
- 🔌 EV Charging Stations (EVPCS) for e2W, e3W, e4W, Passenger Vehicle
- 🏠 Opportunities and Challenges in EV Charger Component Localization
- 🏗️ Scaling of Grid Infrastructure to Support Increasing Deployment
- 👤 Improved Utilization and Consumer Experience Through Interoperability
- 🔌 Fast Charging vs. Battery Swapping
