

INDIA BATTERY MANUFACTURING AND SUPPLY CHAIN SUMMIT 2024

Date: 23rd-24th January 2024 Time: 10:00 - 18:00 IST

Location: Novotel Hyderabad Convention Centre Novotel & HICC Complex (Adjacent to HITEC City), India

Presented By

BNSCC&IRR

Thrust Areas of India Battery Manufacturing Supply Chain Council (IBMSCC)

To emphasize the exploration of energy storage raw materials in India

To encourage the refining and chemical processing of materials in India

To develop equipment, machinery & components supply ecosystem in India

To promote research & development of new materials for energy storage through national labs and corporate organizations

To create an appropriate policy framework at the state and central level

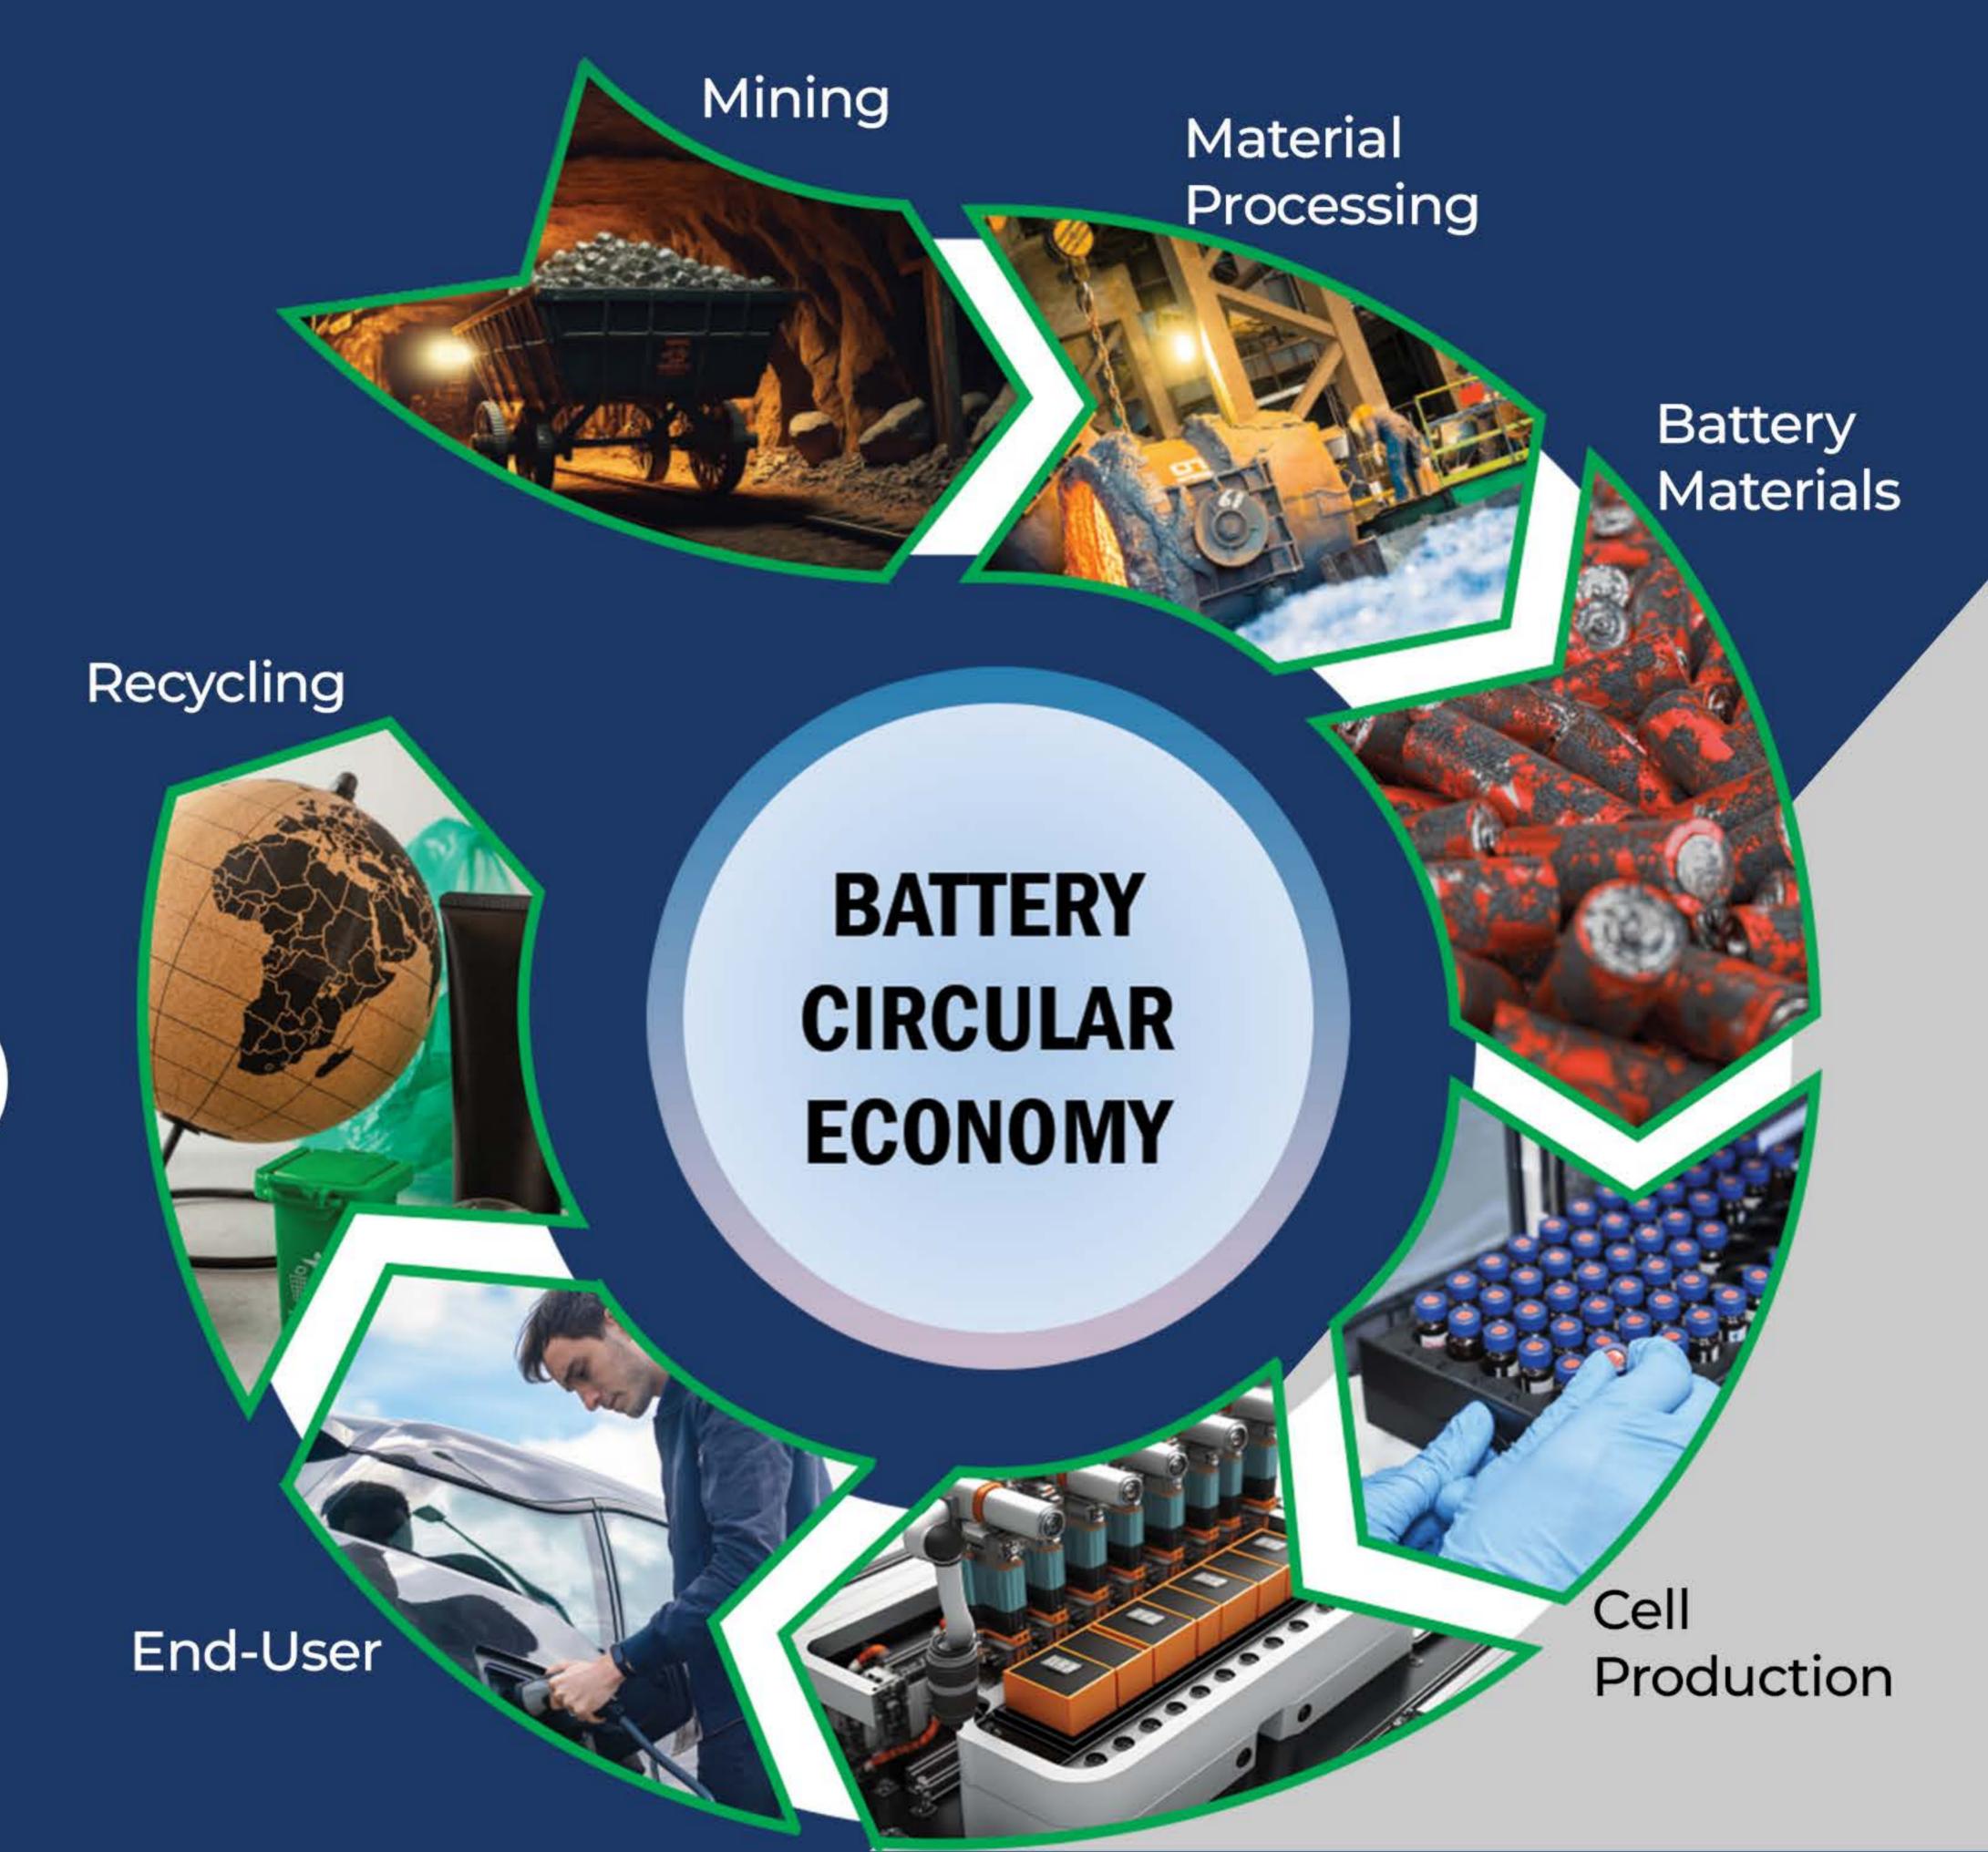

To make india a global export hub for processed battery grade materials to ather countries

To promote skill development and capacity building activities in this domain

To support bilateral partnerships for raw materials procurement and technology transfer

Who Should Join?

Technology Providors, Potential Advanced Battery Manufacturers.

Battery

Manufacturer

Equipment and component companies

Raw material, mining, refining and chemical processing companies

R&D institutions

Recycling, urban mining companies

Policy makersand regulatory authorities

Thrust Areas of India Recycling & Re-USE Initiative (IRRI)

- To facilitate market assessment, techno commercial analysis, policy advocacy, etc.
- Identify the challenges & opportunities.
- Enable the policy and regulatory framework & standards to create a sustainable ecosystem.
- Create a sustainable battery waste procurement & green recycling process.
