

WORLD ENERGY STORAGE DAY

Virtual Global Conference and Expo

22 September, 2021

www.energystorageday.org

75+ industry leaders
from around the world

20,000+ international
attendees & 30+ global
partners

Discussions focussed
on Energy Storage and
E-mobility markets

Focus Segments

STATIONARY ENERGY
STORAGE

E-MOBILITY AND
EV INFRASTRUCTURE

GREEN HYDROGEN

MANUFACTURING

MESSAGE

I am pleased to learn that India Energy Storage Alliance and its partners are holding a digital World Energy Storage Day Global Conclave and Expo on September 22.

Energy is a key driver of growth across various sectors of development. As India is rapidly marching ahead fulfilling dreams and aspirations of the youthful nation, our energy and electricity needs are also growing. Our approach for energy planning is integrated and our energy agenda is inclusive.

When it comes to choosing between environment and development, India believes that these two are not contrary entities, but complementary to each other. Be it the endeavour to take clean fuel to every family, or efforts for eco-friendly mobility system, this idea gets reflected in our policy and strategy.

Energy security and sufficiency are pivotal for self-reliant India. We are constantly striving to ensure that electricity reaches everyone, there is sufficient electricity for everyone, and that our environment remains clean. We are also making sure that our resolve towards clean and renewable energy is taken care of in every aspect of life.

The world looks at India with hope as a reliable partner. In view of this expectation of the world from India, we are engaged in connecting the entire world. International Solar Alliance is the outcome of this thinking, that aims to bring together the whole world for common need and good.

For energy access and energy sustainability, we are focussed towards building a robust storage capability in the country. Efforts like the Global Conclave and Expo strengthen this vision. The presence of policy makers, technical experts and other participants from various countries reflects mankind's commitment to sustainable development.

May the Global Conclave and Expo be a huge success.

(Narendra Modi)

2019-2018-2017 Celebration

IESA & GESA
Wishes you on occasion of 2nd World Energy Storage Day!
22nd September 2018

Energy Storage Assoc @storage_ESA · 1d
Proud to acknowledge #EnergyStorage has global impact! Shout out to @IndiaESA as they carry the message throughout SE Asia ~ #3rdWorldEnergyStorageDay : bit.ly/2m6j5oN ~ #AmplifyingEnergy #EnablingTheGrid #EnablingCleanEnergy

SUN Mobility @SUN_mobility · 2h
Energy storage technologies play a vital role in renewable integration, energy access, e-mobility & smart cities initiatives. SUN Mobility looks forward to continue innovating in this area to enable the shift to clean, efficient mobility solutions.
